Tourist Touch

Revolutionizing Travel Planning and Experiences

Touching Destinations, Transforming Journeys

Team Name: LEGION

Team Members:

1. Macha Praveen (Team Leader)

2. Botla Veerendra

3. Marepalli Santhosh

Problem statement alignment: Topic 2

Planning group tours is complex, with challenges like diverse preferences, unfamiliar destinations, and real-time collaboration. Tourist Touch solves this by offering an all-in-one intelligent assistant that simplifies trip planning, booking, and on-the-go support.

Introducing Tourist Touch

The Future of Travel Planning and Execution

Vision: Revolutionize travel with a seamless, intelligent, and engaging experience for travelers, agents, and merchants.

Core Features:

- **Real-Time Collaboration:** Role-base access lets Travellers, Agents and admins manage itineraries Easily. Agents can update plans, while Travellers receive live updates.

- **AI-Powered Assistance:** GPT-style interaction, and on-the-go support, similar to having a travel expert in your pocket.

- **Token-Based Economy:** Earn, redeem, and trade tokens for exclusive deals and experiences.

- **Emergency Assistance:** Instant alerts two nearby police stations, saved emergency contacts, or the app's global health team for issue like last documents, health emergencies or safety corners.

- **Gamified Engagement:** Challenges, leaderboards, and reward-based activities for a fun and immersive travel experience.

- **Augmented Reality (AR):** Virtual destination previews and AR navigation for an interactive travel experience.

Differentiators:

- **Comprehensive Ecosystem:** Planning, booking, and community interaction, all in one app.

- **Cutting-Edge Tech:** Blockchain-powered tokens, AI-driven insights, AR navigation, and Supabase scalability.

Why Tourist Touch Stands Out

Key Innovations：

- **Snapshot Memories**: Capture destination moments and create shareable travel diaries.
- **Real-Time Collaboration**: Drag-and-drop itinerary planner and live updates.
- **Integrated Marketplace**: Merchants accept tokens for goods and services, fostering a unique ecosystem.
- **Budget Tracking**: Dynamic expense management with token-based settlements.
- **Emergency & Health Support**: Dedicated teams and global volunteers for safety and assistance.

Problem statement alignment:

Tourist Touch addresses the pain points of group travel with:

- **Expert Insights:** Must-visit attractions, local customs, dining options, and real-time recommendations tailored to diverse group preferences.
- **Seamless Scheduling:** Drag-and-drop itinerary planning and live collaboration eliminate planning chaos.
- **Integrated Tools:** Booking, budget tracking, and personalized suggestions enhance convenience and decision-making.

Technical Edge:

- **Frontend**: XJS for a sleek, progressive web app experience.
- **Backend**: Supabase with real-time database, authentication, and API capabilities.
- **Blockchain**: Transparent, secure token transactions and smart contracts.

Impact:

- **For Travelers**: Simplified planning, exclusive benefits, and memorable experiences.
- **For Merchants**: New revenue streams and global reach.
- **For Communities**: Engaged and empowered global travel community.

Thank You
